

Abstract

Method for controlling the locking of a lock, and lock

Method for controlling the locking of an electronic lock (5), including the following steps:

a user (4) is identified vis-à-vis the electronic lock,

the electronic lock (5) displays a question,

the user transmits the question to a central station (1),

the central station computes the answer to the question and transmits this answer to the user,

the user enters the answer in the lock,

the lock verifies whether the response is correct and decides according to this answer whether to unlock the door

a receipt code is displayed by the lock (5) and transmitted by the user to the central station (1) with the aid of the mobile equipment (3).
