(54) Title: **BREATHABLE STAIN RESISTANT UNDERGARMENT FOR USE WITH AN ABSORBENT ARTICLE**

(57) Abstract

An undergarment (20) for use with an absorbent article is described. The undergarment comprises a shell portion (30), a crotch portion (40) and elasticized leg openings (34) defined by the shell portion (30) and the crotch portion (40). The shell portion is breathable and preferably, liquid resistant. The crotch portion (40), which is elastically extensible in at least one of the longitudinal and the transverse directions, comprises an absorbent body layer and a liquid resistant barrier layer, and is preferably, breathable. The elasticized leg openings (34) cooperate with the elastically extensible crotch portion to provide a biasing force for an absorbent article against a wearer's body. A system for control of bodily fluids comprising an undergarment and an absorbent article is also described.
