(54) Title: METHOD AND SYSTEM FOR REAL TIME HOUGH TRANSFORM

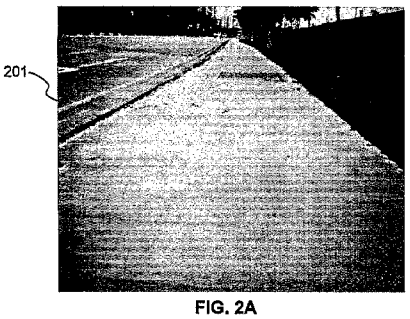

FIG. 2A

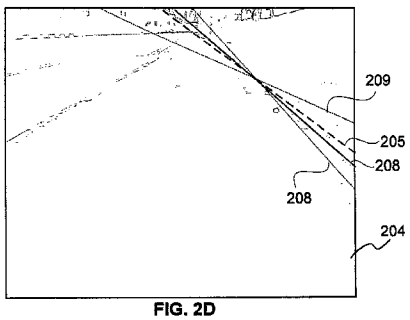

FIG. 2D

(57) Abstract: The present invention provides a method and system for processing a video having a plurality of images, wherein a reference line, represented in term of a reference angle in Hough space, is identified from one of the plurality of images of the video, the method comprising generating an angle range based on the reference angle; and processing a subsequent image of the video to identify a corresponding line in a Hough space having an axis of the angle range.
