

A DRINKS PREPARATION MACHINE, A SYSTEM WITH A DRINKS PREPARATION MACHINE, METHOD FOR ITS ACTIVATION

ABSTRACT

A method serves for operating a drinks preparation machine (1), for producing a total product amid the use of a portion package (3), and according to a preparation prescript. The method comprises the following steps:

- detecting a portion code (33) of a portion package (3) by way of a portion recognition unit (132);
- determining first preparation parameters of the preparation prescript which are assigned to the portion code (33) and are stored in the drinks preparation machine (1), and determining second preparation parameters of the preparation prescript, wherein at least one of the first and/or the second preparation parameters is an adaptable preparation parameter, and at least one preparation parameters is not adaptable;
- detecting a user input for adapting at least one adaptable preparation parameter;
- preparing the total product according to the preparation prescript with at least one adapted preparation parameter.
