Fig. 3

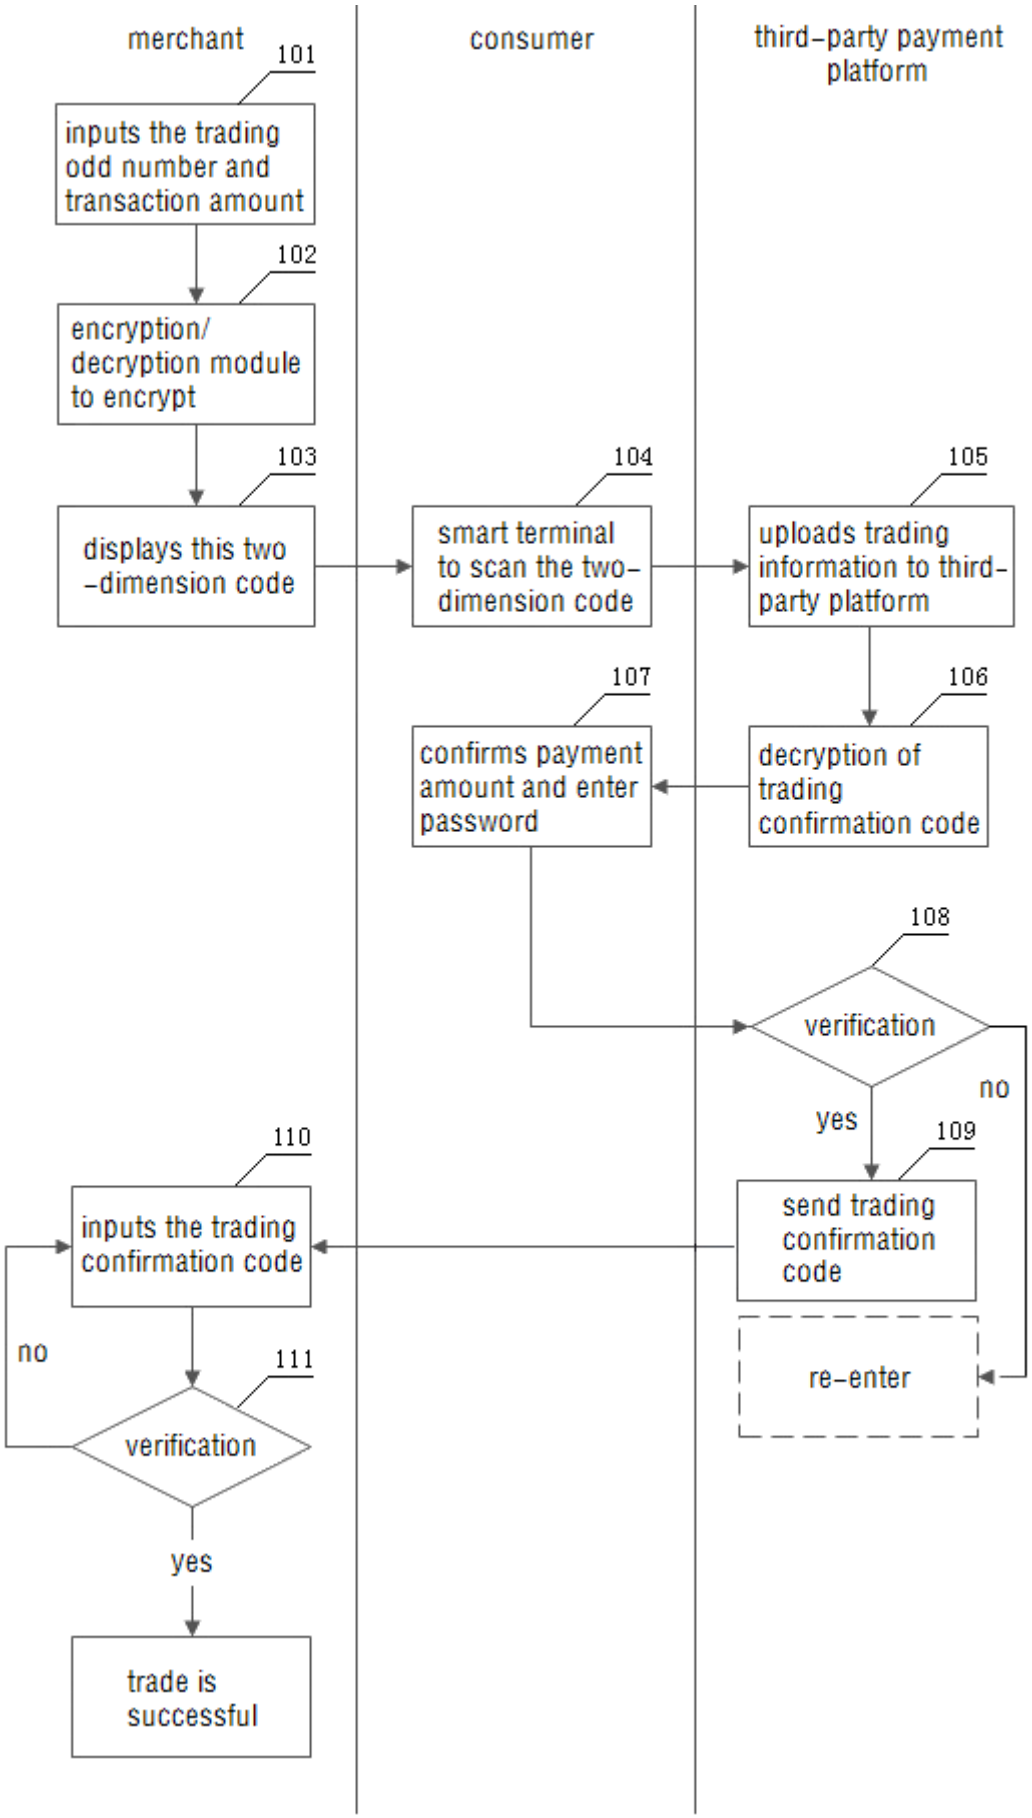

merchant
consumer
third-party payment platform
101
inputs the trading odd number and transaction amount
102
encryption/ decryption module to encrypt
103
displays this two -dimension code
104
smart terminal to scan the two-dimension code
105
uploads trading information to third-party platform
106
decryption of trading confirmation code
107
confirms payment amount and enter password
108
verification
no
yes
109
send trading confirmation code
re-enter
110
inputs the trading confirmation code
no
111
verification
yes
trade is successful
