(54) **Title**: CONCURRENT USE OF MULTIPLE USER INTERFACE DEVICES

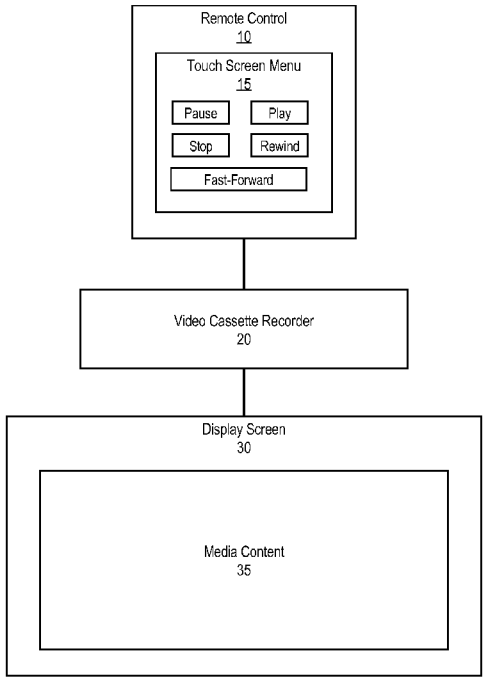

FIGURE 1

(57) **Abstract**: A method for displaying multimedia content is described. The method includes transmitting multimedia content for display on a first user interface device; concurrently transmitting related content for display on a second user interface device, at least a portion of the multimedia content and at least a portion of the related content being similar or identical; obtaining user input received at the second user interface device; performing an operation associated with the multimedia content displayed on the first user interface device, based on the user input received at the second user interface device; where the method is performed by at least one device comprising a processor.
