(54) Title: PROGNOSTIC SIGNATURE FOR CANCER RECURRENCE AND RESPONSIVENESS

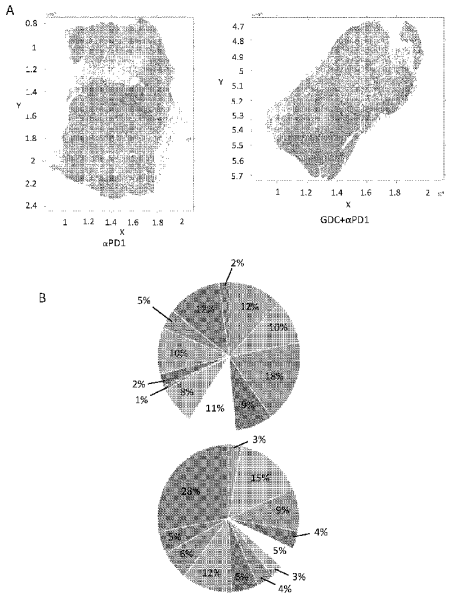

Figure 1

(57) Abstract: This invention relates generally to biomarkers that are useful for determining whether a cancer is likely to recur in a subject, and/or determining whether a subject is likely to respond to cancer therapy. The invention therefore relates to methods, kits and compositions for determining whether a cancer is likely to recur in a subject, or whether a subject is likely to respond to cancer therapy, and to methods of treatment based on a determination that a subject with cancer is likely to respond to cancer therapy.
