DISPOSABLE DIAPER WITH ELASTICIZED WAIST REGIONS

The present invention aims to provide a disposable diaper making it unnecessary to cover elastic members with a topsheet and a backsheet and thereby offering a good feeling to wear the diaper.

Disposable diaper 1 comprises a liquid-pervious topsheet 2, a liquid-impervious backsheet 3 and a liquid-absorbent core 4 disposed between these two sheets 2, 3 so that the diaper is may be longitudinally composed of a front waist region 10, a rear waist region 11 and a crotch region 12 extending between these two waist regions 10, 11. Elastic members 8 are encircled one line by one line with parts
