(84) Designated States (unless otherwise indicated, for every
kind of regional protection available): ARIPO (BW, CV,

(54) Title: MOBILE DEVICE FOR WORKING SPORTS SURFACES

(57) Abstract: In a mobile device (1) for the treatment of sports surfaces (2) lawns, with a machine frame (4), at least one support element (6) mounted on the machine frame (4), which is preferably a roller element, and in the working position rests on the ground and supports the machine frame (4), at least one working device (8) for working the ground, which is arranged behind the supporting element (6) in the working direction (A), it can be provided that the working device (8) has at least a first holding beam (10) which runs transversely with respect to the direction of travel (A) and on which a plurality of tine devices (12) are arranged, the respective tine device (12) having at least a first tine section (14) which projects from the holding beam (10) and having a second tine section (16) which projects at an angle α of between 45°degrees and 135°degrees from the first tine section (14) and points in the direction of the ground to be worked.
