
A first member receives a fund flow request for a specified amount between a payer and a payee
102
The first member determines a fund flow route between the first member and a second member corresponding to the payee, where the fund flow route includes the first member, the second member, and several relay members
104
The first member initiates a compliance check request to at least two members other than the first member in the fund flow route, so that the at least two members concurrently perform a compliance check on a fund flow event corresponding to the fund flow request
106
The first member completes the fund flow event based on the fund flow route when all compliance check results of the fund flow event of all members in the fund flow route are qualified
108

301
Initiate a remittance request
Determine that a balance is sufficient and a payee exists
302
Initiate a compliance check
303
Initiate a "routing request" contract operation
304
Determine a remittance route
305
306
Initiate a compliance check request
Return a check result
306
Initiate a compliance check request
Return a check result
Initiate a "compliance evidence deposit" contract operation
307
Initiate a "remittance" contract operation
308
Monitor a change in a blockchain balance
309
310
Remittance succeeds
Recover a water level
311
312
Adjust the water level based on historical change data
313
Adjust the water level based on fund transaction prediction data
314
Manually adjust the water level
Monitor a change in a blockchain balance
309
310
311
Recover a water level
Send a payment receiving notification

FIG. 16

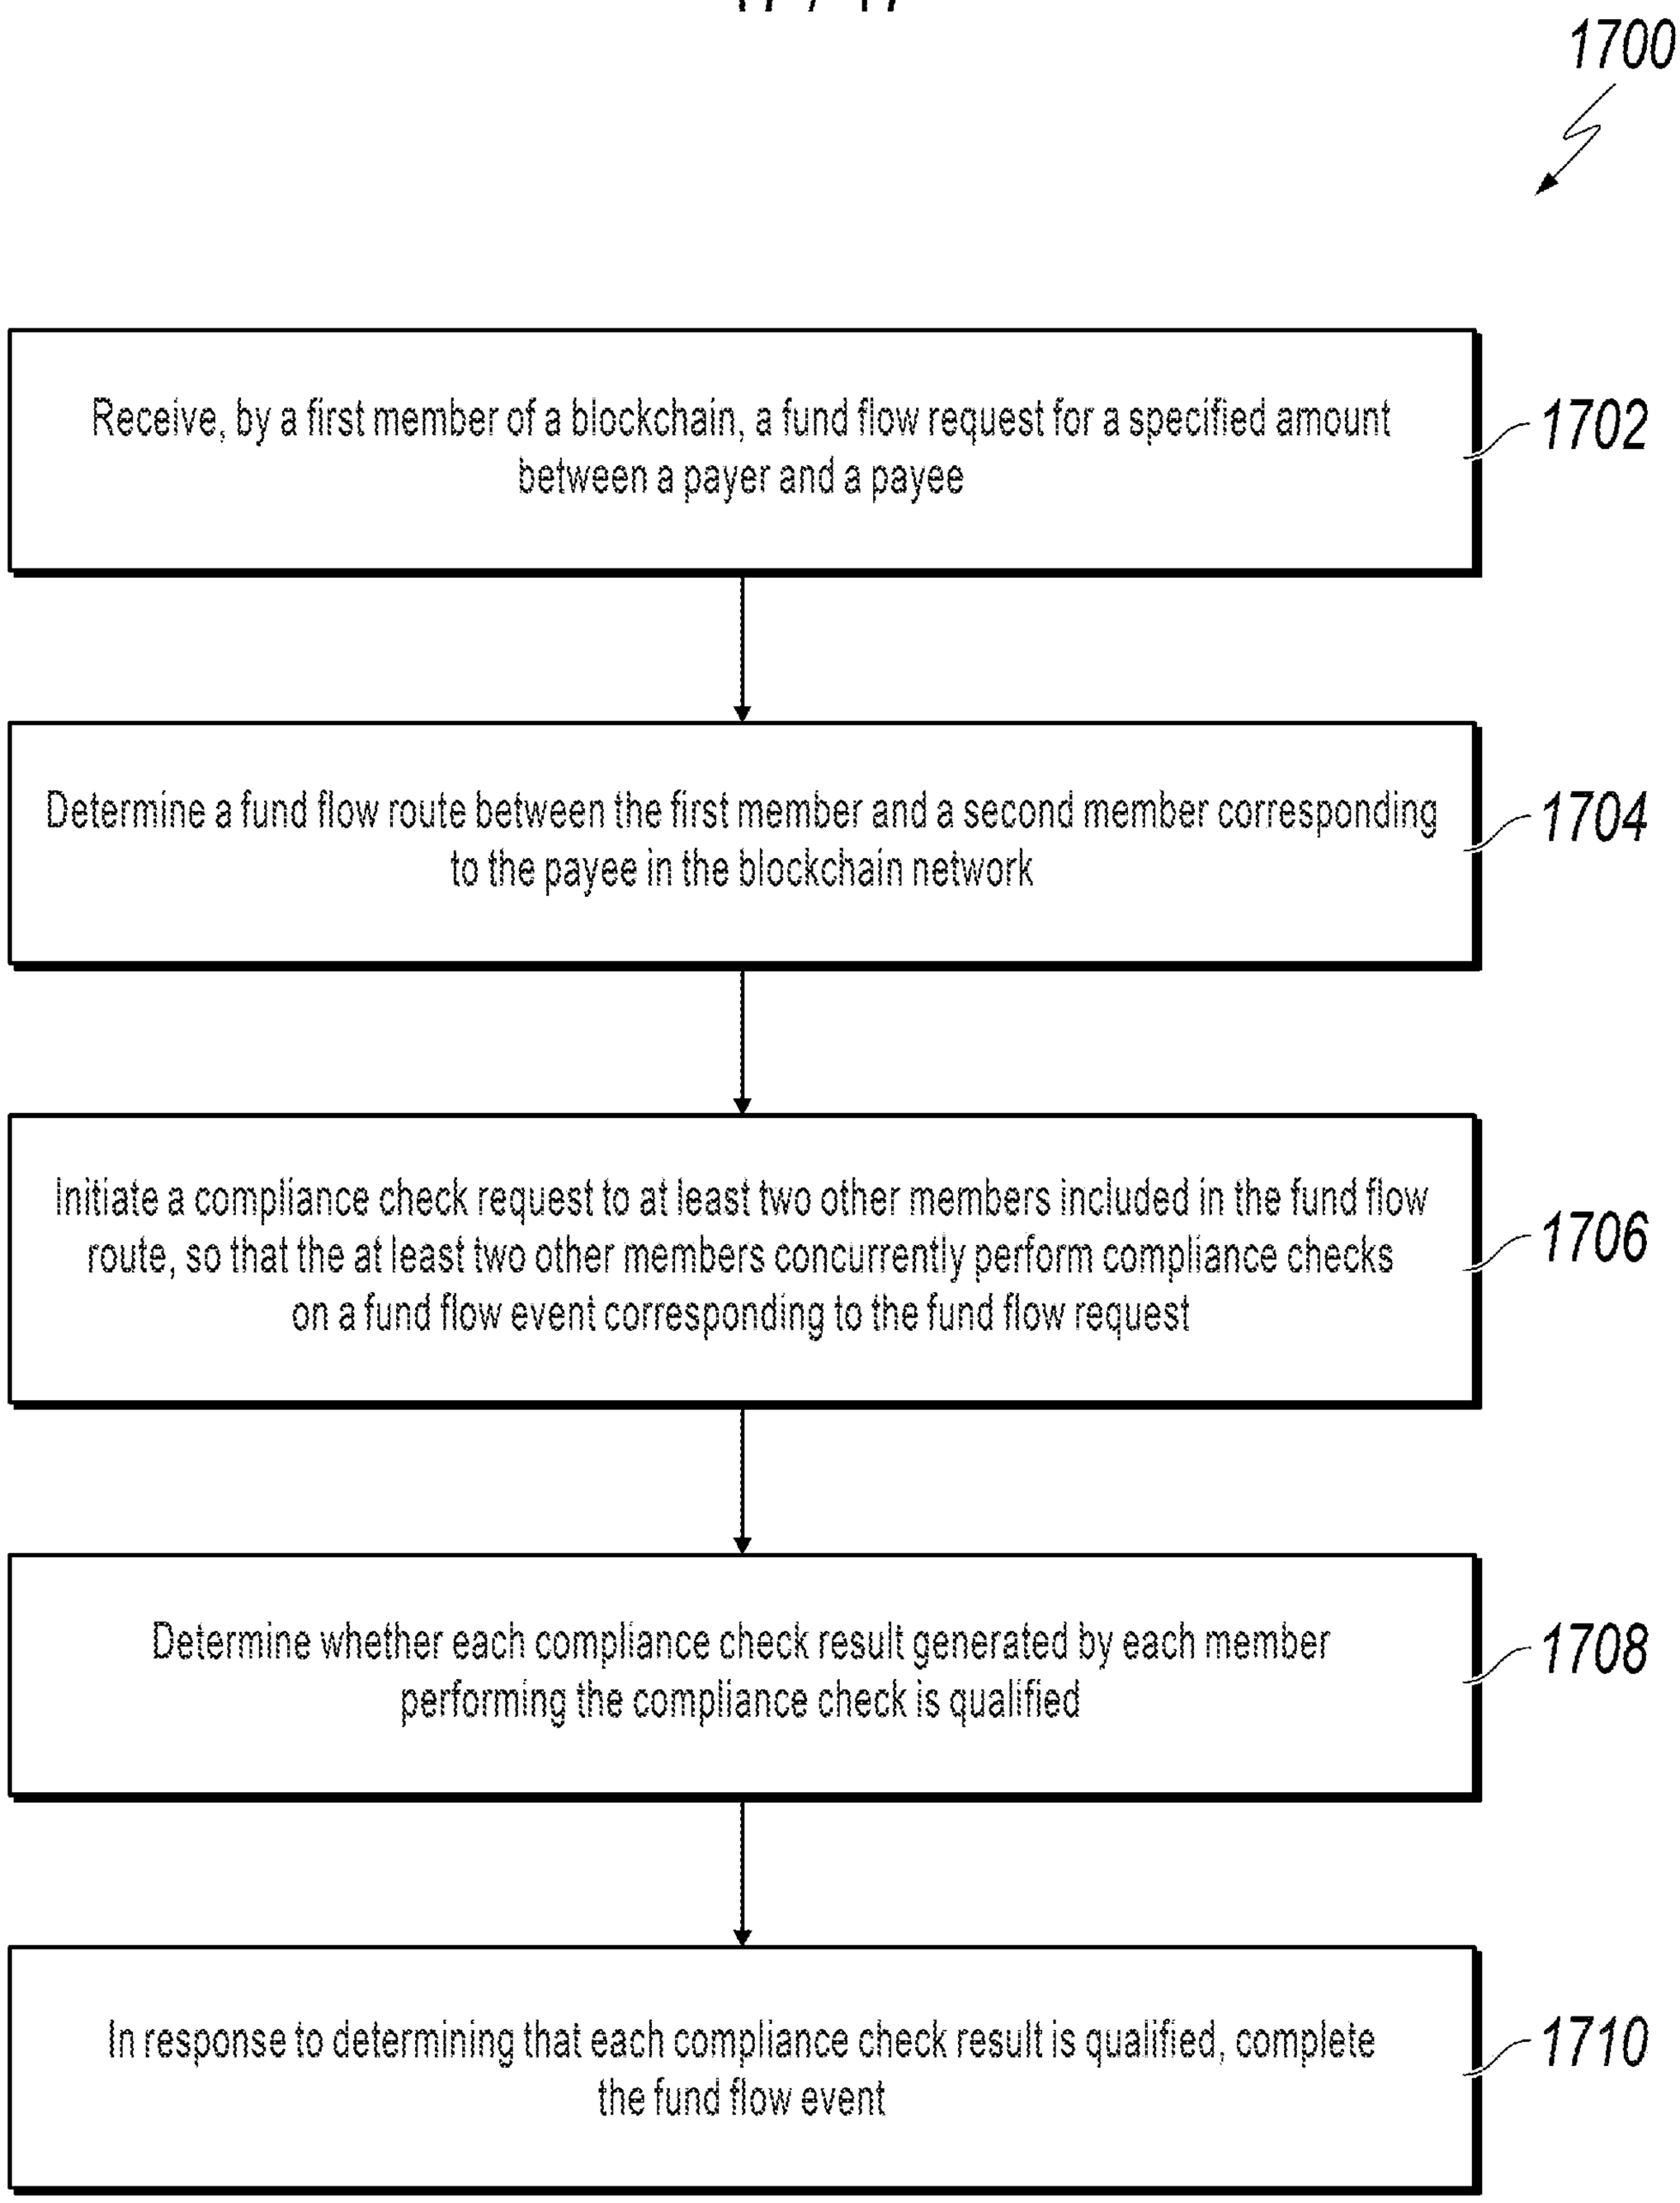

1700
Receive, by a first member of a blockchain, a fund flow request for a specified amount between a payer and a payee
1702
Determine a fund flow route between the first member and a second member corresponding to the payee in the blockchain network
1704
Initiate a compliance check request to at least two other members included in the fund flow route, so that the at least two other members concurrently perform compliance checks on a fund flow event corresponding to the fund flow request
1706
Determine whether each compliance check result generated by each member performing the compliance check is qualified
1708
In response to determining that each compliance check result is qualified, complete the fund flow event
1710
