(54) Title: A RAPAMYCIN COMPOSITION

Figure 1

(57) Abstract: Rapamycin is a known medicinally therapeutic substance. A problem with Rapamycin is that it is quite unstable and prone to chemical degradation during storage. This can lead to medication becoming 'under strength' during its shelf life. It is an object of the invention to go at least some way towards addressing this. The invention is a composition for topical treatment, comprising rapamycin as active ingredient; vehicle comprising monolaurin, for example as glyceryl monolaurate and monomyristin, for example as glyceryl monomyristate; and water as a solvent.
