

WIRELESS COMMUNICATION DEVICE AND WIRELESS COMMUNICATION METHOD

ABSTRACT

5 The present invention contributes to providing a wireless communication device and
a wireless communication method with which it is possible to reduce the information amount
of information transmitted and received between cooperating wireless communication
devices. A first wireless communication device comprises a control unit that assigns an
identifier to a second wireless communication device that is not included in a basic service
10 set to which the first wireless communication device belongs, and a transmission unit that
transmits a signal including the identifier.
