(54) Title: METHOD AND SYSTEM FOR ENTERPRISE BUSINESS PROCESS MANAGEMENT

(57) Abstract: An enterprise business process management system (100) and method for definition and execution of business processes formed from portions of one or more business applications present in an enterprise. The enterprise business process management system (100) includes a server (101), a router (109), and an interface (111) for defining and executing such business processes. A data quality business process detects, corrects, analyzes, and reports quantitative and qualitative characteristics of application data and transactional data present in the enterprise. An interface module is provided by which a user may select and define function definition information for a business process.
