(54) Title: MAIL DISPENSER SYSTEM WITH SORTERS

(57) Abstract: There is provided a mailbox dispenser system configured to sort and dispense mail items. The system is constructed in a manner which allows for easy access by users, and does not have a substantial footprint, so it can be installed in locations with space constraints. Due to the low space requirement, the mailbox dispenser system can be deployed in multiple locations, providing a versatile deployment option for mail dispensing. In addition, the mailbox dispenser system need not be a permanent installation and can be moved to a wide range of locations.
