

ABSTRACT
A MULTIPOINT LOCK

162162

G00002

A lock for use as a multipoint lock, the lock having:
a lock body,
5 a lock tongue which is moveable between a locking position and a free position,
an actuator to move the lock tongue,
a deadlocking member in the lock body and which is moveable between a deadlocking
position to deadlock the lock tongue and an undeadlocking position, and,
attachment means attachable to a remote lock operator to move the operator without
10 any lost motion.
