Abstract

The invention relates to an interchangeable backstrap (7) for a firearm (1), wherein the backstrap (7) has at least one coupling interface (45) for a moving part (55, 57, 59, 61) of the weapon, specifically the trigger mechanism, and a firearm (1) that has such a backstrap (7). The invention also relates to a set comprising at least one firearm (1) and at least one interchangeable backstrap (7) or at least two interchangeable backstraps (7).
