Claims

1. Use of 1-[2-(2,4-dimethylphenylsulfanyl)phenyl]piperazine or a pharmaceutically acceptable salt thereof in the manufacture of a medicament for the treatment of a disease selected from depression, anxiety, or chronic pain, wherein said medicament is for use in a patient who has previously received medication (or is still receiving it) for the treatment of said disease which medication was ceased or reduced (or has to be ceased or reduced) due to sleep or sexually related adverse events.

2. The use of claim 1, wherein the medication was ceased or reduced (or has to be ceased or reduced) due to sleep related adverse events.

3. The use of claim 1, wherein the medication was ceased or reduced (or has to be ceased or reduced) due to sexually related adverse events.

4. The use of claim 1, wherein the medication is selected from the group consisting of selective serotonin reuptake inhibitors, selective noradrenaline reuptake inhibitors, noradrenaline/serotonin reuptake inhibitors, and tri-cyclics.

5. The use of claim 1, wherein the disease is depression, the medication is selective serotonin reuptake inhibitors, and the medication was ceased or reduced (or has to be ceased or reduced) due to insomnia.
