(54) **Title:** INVENTORY MONITORING AND CONTROL APPLICATIONS

(57) **Abstract:** Inventory control system which automatically monitors weights of items both before and after dispensing. The difference in weight is used to determine an amount of product that has been dispensed. The amount of product that has been dispensed as compared with the amount of money that the employee takes in for dispensing the product. This can be used to determine employee theft. Embodiments can use various techniques to determine who are the dishonest employees.
