(54) Title: USE OF BINDING PROTEINS FOR TREATMENT OF SOLID TUMORS

(57) Abstract: The present application encompasses TCRs and combinations of TCRs for treatment of melanoma (e.g., cutaneous melanoma, uveal melanoma, or advanced melanoma), non-small cell lung cancer (NSCLC), head and neck cancer (e.g., non-nasopharyngeal head and neck cancer), sarcoma, thyroid cancer, cervical cancer, ovarian cancer, anal cancer, genital cancer, or anogenital cancer. Due at least in part to the heterogeneity of solid tumor cells, therapies used to treat solid tumors often result in a partial response. The present disclosure includes, among other things, multiplexing of TCRs in a single therapy or therapeutic regimen of engineered T cells.
