

ABSTRACT

RUBBERY POLYMER EXTRUSION-DRYING APPARATUS AND PROCESS FOR PRODUCING RUBBERY POLYMER

Disclosed are an expansion-type extrusion dryer for a rubbery polymer and a process for producing a rubbery polymer, which overcome the disadvantage of occurrence of string-shaped crumbs in expansion drying of the rubbery polymer. The extrusion dryer for a rubbery polymer of the present invention has a cutter device (5) for cutting an extruded rubbery polymer near the extrusion part (4) for extruding crumb consisting of the rubbery polymer. The cutter device (5) has a blade part (51) having a plated blade (512).
