

ABSTRACT

COMBINATION OF PEN AND CHOPSTICK

In a combination of pen and chopstick, a hollow connecting body (21) has opposite first and second end portions (24, 25), an extension tube (22) connected to the second end portion 25, a biasing member (23) is disposed in the extension tube (22), a nip holder (3) is connected to the first end portion (24), a pen core (4) includes a tail portion (41) abutting against the biasing member (23), and a nip (42) protruding out of the nip holder 3. A chopstick 5 is connected to the second end portion 25. A tubular pen body 7 is selectively connectable to one of first and second threads (244, 254) of the connecting body (21) to cover the chopstick (5) or the nip holder (3).
