(54) **Title**: METHODS FOR ENHANCING IMMUNOGEN SPECIFIC IMMUNE RESPONSES BY VECTORED VACCINES

(57) **Abstract**: Provided herein are methods for inducing a specific immune response in a subject by administering to the subject an immunogenic composition comprising a recombinant expression vector, or a vector particle comprising the recombinant expression vector, which vector comprises a polynucleotide sequence that encodes an immunogen of interest. The methods further comprise administering an adjuvant composition either concurrently or sequentially with the immunogenic composition.
