(54) Title: MOBILE PRODUCTION SYSTEM FOR CEMENT PANEL

(57) Abstract: The invention relates to an automated mobile production system for fabricating a cement panel or composite cement panel. The system includes a movable container and a conveyor system inside the container aligned along a longitudinal axis of the container. The system further includes a plurality of independent manufacturing stations inside the container and aligned along the conveyor system. The container is preferably an international standard shipping container so that being compact and movable from place to place. Further, the system includes a removable mortar mixing station affixed to the outer top side of the container when the system is in operation, and is removed and stored inside the container during transport of the system.
