BOTTOM COVER TAPE FOR ELECTRONIC PART CARRIER

Abstract of the Disclosure

A bottom cover tape for electronic part carrier includes:
a supporting base material layer; and an adhesive layer, wherein
the adhesive layer contains: 100 parts by weight of a base
5 polymer; 1 to 50 parts by weight of an alicyclic saturated
hydrocarbon resin; and 0.1 to 20 parts by weight of at least
one of an amphotoeric surface active agent free of halogen atom
and sulfur atom and a nonionic surface active agent free of
halogen atom and sulfur atom, so as to obtain a bottom cover
10 tape having an excellent adhesivity to carrier tape, good
antistatic properties and excellent anti-blocking properties
and corrosion-inhibiting properties with respect to chip parts.
