

ABSTRACT

Aspects concern a repayment server, comprising a communication interface configured to receive a specification of a loan and a specification of one or more deduction sources for deducting amounts to pay back the loan, a processing unit configured to determine a plurality of points of time for deducting amounts from the one or more deduction sources to pay back the loan and to determine, for each point of time, an amount to deduct from the one or more deduction sources and a transfer interface configured to deduct, for each point of time, the determined amount from the one or more deduction sources.
