ABSTRACT

A virtual world-based capturing method and apparatus, a device, a medium, and a product. The method comprises: displaying at least one of a main control virtual character and a pet virtual character located in a virtual world (210); displaying a capturing prop control, the capturing prop control being a control used for controlling the main control virtual character to capture the pet virtual character (220); receiving a casting operation on the capturing prop control (230); and in response to the casting operation, displaying a capturing spell effect cast by the main control virtual character on the pet virtual character, and a capturing result of the pet virtual character (240).
