(54) Title: A WET AIR PURIFIER

(54) 发明名称: 一种水洗空气清新器

(57) Abstract: This utility model discloses a wet air purifier which comprises an open container to contain liquid; a netting for separating that disposed at the opening of the container, on which is an orifice with chimbs over its edge; a base that placed at the chimbs of the netting with a cover-electrode motor fixing hole in it; a cover-electrode motor disposed in the cover-electrode motor fixing hole of the base, whose shaft coupled from the top down in turn with an impeller and a centrifugal baffle; a siphon tube removably connected to the bottom of the centrifugal baffle, and with at least one gap at the nozzle that connected to the centrifugal baffle; a cover that covers the base, with a gas orifice on it. This utility model can remove the harmful substance in the indoor air effectively, and produce a lot of beneficial fresh air.
