(54) Title: MULTIDIMENSIONAL STORAGE MODEL AND METHOD

(57) Abstract: A multidimensional storage model includes a set of non-sparse entries for each of a plurality of dimensions. The non-sparse entries each identify an associated data value. A set of interdimensional links is provided for each non-sparse entry. The interdimensional links each identify an intersection between non-sparse entries in disparate dimensions and collectively identify all intersections between non-sparse entries in the dimensions.
