

Abstract

Provided are a fragrance composition containing a 1-ethylcyclohexanecarboxylic acid ester represented by General Formula (1) as an active component, use of a 1-ethylcyclohexanecarboxylic acid ester as a fragrance, and a method for producing a 1-ethylcyclohexanecarboxylic acid ester. The fragrance composition has an impression of an herbal scent with excellent diffusibility of the scent because it contains as an active component a 1-ethylcyclohexanecarboxylic acid ester that can impart an herbal aroma and provide further diffusibility of the scent. In Formula (1), R^1 represents an alkyl group having from 1 to 3 carbons.
