(54) Title: POLYCARBONATE COMPOSITION RESISTANT TO GAMMA RADIATION

(57) Abstract: A thermoplastic polycarbonate molding composition having improved resistance to gamma radiation-induced yellowing is disclosed. Particularly suitable for the manufacture of devices geared for medical applications, the composition contains an additive amount of a stabilizing cyclic acetal of a glycerol monoester conforming structurally to formula (I) where R_1 denotes a C_{1-30} -alkyl group and R_2 denotes an aryl radical.
