(54) **Title:** BLOCKCHAIN-BASED SMART CONTRACT CALL METHODS AND APPARATUS, AND ELECTRONIC DEVICE

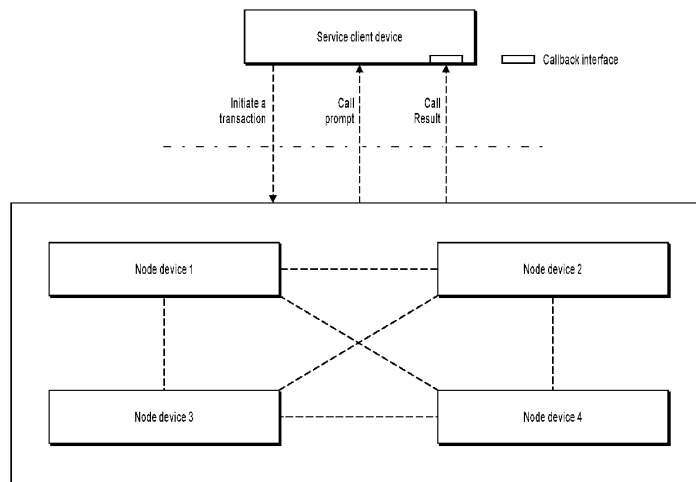

FIG. 4

(57) **Abstract:** Implementations of the present specification disclose blockchain-based smart contract call. In an implementation, a target transaction initiated by a client device of a blockchain is received, wherein the target transaction is preconfigured with a call rule used to initiate a call for a smart contract. The call rule configured for the target transaction is obtained. The call rule to initiate a call for a target smart contract is executed. A call result is returned to the client device when the call for the target smart contract is completed, the call result comprising a call feedback received from a called device.
