(57) Abstract: Disclosed is a cleaning article to be used while being attached to a holder. The cleaning article includes: a base sheet; a brush portion provided on one side of the base sheet; and a holding sheet provided on the other side of the base sheet. The base sheet, the brush portion and the holding sheet are fusion-bonded together to have at least two fusion-bonded portions which are spaced apart from each other and define a holding space between the base sheet and the holding sheet for accommodating the holder. One of the base sheet, the brush portion and the holding sheet is provided with a color different from those of the others so that the fusion-bonded portions have a color different from that of the holding sheet.
