

5 A b s t r a c t :

10 DISC PLAYER HAVING DISC CHANGING FUNCTION

15 A disc player adapted to selectively play a plurality of
discs (8) accommodated in a disc holder (7) comprises a
memory (1) for storing a category name for each of disc
storage portions of the holder (7), an operation key group
(24) to be manipulated for specifying the category name of
20 the discs to be played, and a system control circuit (4)
for retrieving from the memory (1) the category name
specified by manipulating the key group and automatically
playing a plurality of discs in the disc storage portions
given the category name.
