CLAIM:

1. A multipurpose ancestral tablet case for storage and display comprising:

a case having a split interference; and

a display stand positioned at an inside bottom of said case with at least a storage space for accommodating both an ancestral tablet and ritual articles, said display stand having a surface to host the ancestral tablet so as to show it outward as the split interference being set at an opening position~~.~~, said display stand being provided with a rail so as to position said display stand at the center of said case during the progress of opening and closing of the split interference.

~~2. The multipurpose ancestral tablet case of claim 1, wherein said case and said display stand are in a shape of three-dimensional geometry.~~

~~3. The multipurpose ancestral tablet case of claim 1, wherein said case includes a left half and a right half made in symmetrical format with respect to an axis so as to constitute the split interference at the opening position.~~

~~4. The multipurpose ancestral tablet case of claim 3, wherein a locking element is provided at both the left half and right half near the split interference for securing the left half and right half when the split interference is at a closing position.~~

~~5. The multipurpose ancestral tablet case of claim 1, wherein a screen is circumferentially provided within said case so as to display different background.~~

5

~~6. The multipurpose ancestral tablet case of claim 1, wherein at least a loop is provided at the outer side of said case for carrying and lifting by user.~~

~~7. The multipurpose ancestral tablet case of claim 1, wherein said display stand is further provided with a rail so as to position said display stand at the center of said case during the progress of opening and closing of the split interference.~~

~~8. The multipurpose ancestral tablet case of claim 1, wherein the surface of said display stand is further provided with a slot so as to receive the ancestral tablet.~~

~~9~~2. The multipurpose ancestral tablet case of claim 1, wherein s a snap deck is provided at the bottom of said display stand so as to snap and secure to the bottom of said case.
