ABSTRACT OF THE DISCLOSURE

5

10

15

A self-punching fastener (10), which in a way safe against rotation and pressing out can be pressed into a metal sheet member (40) having an annular body, the side of which facing the metal sheet is having radially disposed projections (15, 25), which, during the pressing-in, are pressed into the metal sheet member (40) and thereby are securing the fastener (10) against rotation, wherein in the centre an interior thread (11) is positioned and, wherein on the side facing the metal sheet member (40) in the set state there is provided an annular depression (12) into which the material displaced during the setting is pressed.
