Isopropyl 2-methoxyethyl 4-(2-chloro-3-cyano-phenyl) -
1,4-dihydro-2,6-dimethyl-pyridine-3,5-dicarboxylate

Abstract

The present invention relates to the new compound rac-isopropyl 2-methoxyethyl 4-(2-chloro-3-cyano-phenyl)1,4-dihydro-2,6-dimethylpyridine-3,5-dicarboxylate and its pure enantiomers, processes for their preparation and their use as medicaments, in particular for the treatment of cerebral and neuronal disorders, and a new intermediate for their preparation.
