(54) Title: CONTROL CENTER FOR AIR SAMPLING CONTROLLED ENVIRONMENTS

FIG. 3

(57) Abstract: In accordance with an aspect of the present invention there is provided a system for sampling air at multiple locations in a controlled environment. The system includes one or more air sampling devices configured to monitor and test a volume of air within a controlled environment. A control center including a programmable logic controller (PLC) is configured to monitor and control the one or more air sampling devices. One or more touch panel displays are connected to the control center and provide a human-computer interface between the control center and users.
