

PPVC CONNECTOR

Abstract

5 This invention relates to a Prefabricated Prefinished Volumetric Construction (PPVC) connector. The PPVC connector comprises a connecting element; a plurality of first anchors anchored to a first PPVC module; and a plurality of second anchors anchored to a second PPVC module arranged apart from the plurality of first anchors wherein the PPVC connector is adapted to be installed to the first and second PPVC modules such
10 that the connecting element engages the first and second anchors preventing the first and second PPVC modules from moving apart from each other.
