

ABSTRACT OF THE DISCLOSURE:

A packaging bag comprising a heat-sealed, unstretched laminated film comprising:

(A) as an outermost layer, a blended resin layer comprising a polyester resin containing not less than 70 mol % of polyethylene naphthalate-forming units and a polyester resin containing not less than 70 mol % of polyethylene terephthalate-forming units, or a polyester resin layer containing not less than 70 mol % of polybutylene terephthalate-forming units;

(B) a gas-barrier resin layer; and

(C) as an innermost layer, a heat-sealable resin layer,

said resin layers (A) to (C) being disposed in this order.

Such a packaging bag shows excellent label adhesion strength and pinhole resistance.
