ACTION

WO 01/76651 A1

(54) Title: INJECTABLE INTRAOCULAR LENS

(57) Abstract: The present invention relates to compositions comprising polysiloxanes suitable for the preparation of accommo-
dating intraocular lenses, having a specific gravity of greater than about 1.0, a refractive index suitable for restoring the refractive
power of the natural crystalline lens and a viscosity suitable for injection through a standard cannula. The present invention includes
intraocular lenses made from said polysiloxane compositions having a Young's modulus less than about 10 kPa.
