

1/2

Fig. 1

Molecular Weight of EP Copolymer Products When the Metallocene Is Activated with a Series of Borate Activators. Examples 4-7.
Mw Value Extrapolated to Constant 70% Ethylene Conversion.

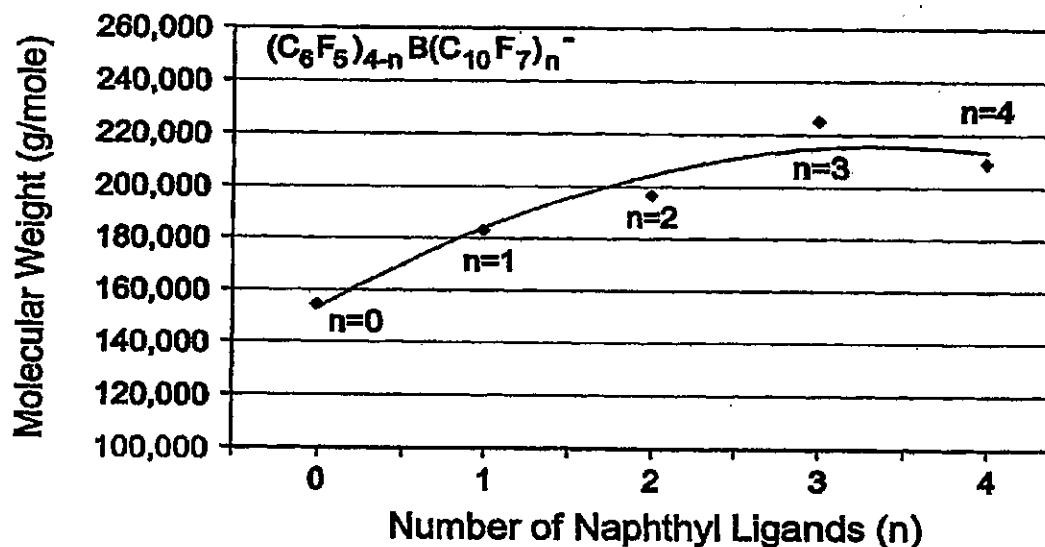

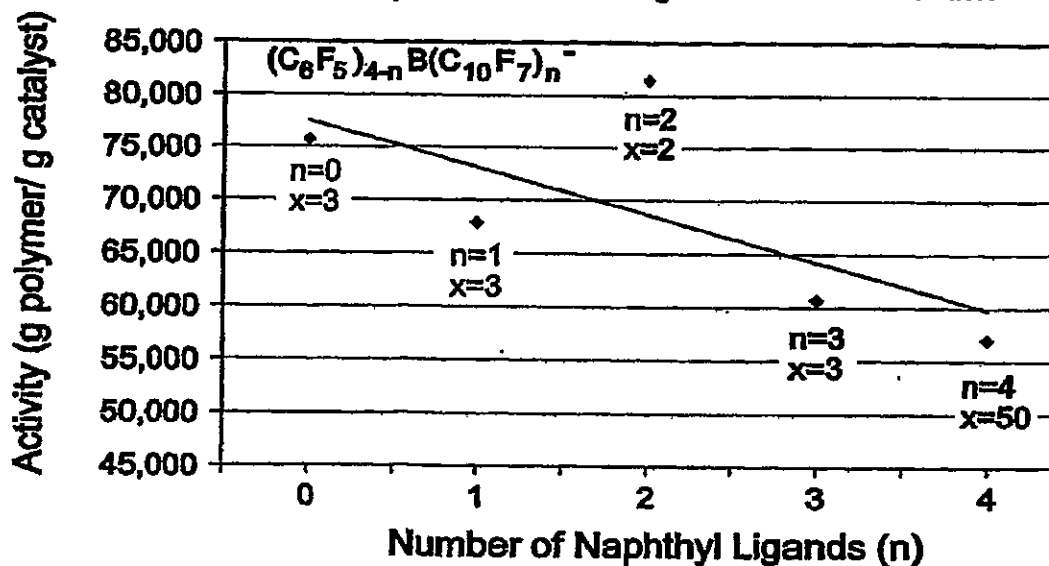

Fig. 2

Catalyst Activity of EP Polymerizations When the Metallocene Is Activated with a Series of Borate Activators. Examples 4-7.
Activity Value Reported is the Average of X number of Runs.

2/2

Fig. 3

Molecular Weight of EP Copolymer Products When the Metallocene
Is Activated with a Series of Borate Activators. Examples 8-17.
Average of Four Repeat Runs With Calculated Confidence Limits.
