

ABSTRACT**METHOD AND DEVICE FOR TREATING WATER CONDENSED FROM WATER VAPOR CONTAINED IN THE AIR, RELATED METHOD AND SYSTEM FOR GENERATING POTABLE WATER.**

5

The invention relates to a device for treating water condensed from water vapor contained in the atmospheric air. According to the invention, means for adding minerals to the condensed water produce remineralized water, which complies with the potable water standards and can therefore be sent in a piping network. The invention also relates to a system for generating potable water, comprising means for condensing water vapor contained in the atmospheric air, combined with such device for treating the condensed water.
