(54) Title: TILE PANEL SYSTEM

(57) Abstract

A panel or partition for subdividing an area such as a work space in an office, the panel or partition comprising a plurality of posts (4) and connecting rails (5) connected between the posts. The rails are supported on clamping blocks (6) clamped to the post, the rails being connected to the blocks by spigots (17) on or holes (19) in the surface of the block. The panel or partition is covered by tiles (2) clipped to the supporting rails, the tiles being of any desired shape, texture and colour. The rails space the tiles from the posts so that a passageway is provided for the passage of cabling through the panel or partition.
