

TOOL FOR MODULAR HEADER CONNECTORS AND MODULAR
RECEPTACLE CONNECTORS

5

ABSTRACT OF THE INVENTION

Assembly tools for mounting a plurality of modules each
of which has a pair of retaining features on a surface thereof,
10 wherein the retaining features are spaced a predetermined
distance apart, are characterized by an elongated bar member
having an array of grasping elements thereon. The grasping
elements engage with the retaining features on the modules to
hold the individual modules to the bar.
