OFFSHORE DRILLING VESSEL

ABSTRACT

The invention pertains to a monohull offshore drilling vessel comprising: a hull having a moonpool and a main deck, which hull further has a hold, which hold has a floor and a side wall, a firing line hoist system that is mounted on the hull above the moonpool, which firing line hoist system comprises a mast, which is connected to the hull of the drilling vessel, a pipe storage for storing drill pipes in a substantially horizontal position, a riser storage for storing risers in a substantially horizontal position, wherein the pipe storage and/or the riser storage extend to the floor of the hold.
