(54) **Title:** TABLE MAINTENANCE FOR HMVP CANDIDATE STORAGE

FIG. 41

(57) **Abstract:** The disclosure relates to table maintenance for HMVP candidate storage. A method for processing video, comprising: determining, during a conversion between a first block of visual media data and a corresponding coded representation of the visual media data, the first block being coded with geometry partition mode; determining, based on at least one table storing history based motion vector prediction (HMVP) candidates which include motion information based on previously coded blocks, motion information of at least one sub-portion of the first block; performing the conversion of the first block using the determined motion information.
