(54) Title: NODMA CACHE

(57) Abstract: A NoDMA cache including a super page field. The super page field indicates when a set of pages contain protected information. The NoDMA cache is used by a computer system to deny I/O device access to protected information in system memory.

Published:

- with international search report
- before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

(88) Date of publication of the international search report:

29 December 2004
