(54) Title: WOUND TREATMENTS AND METHODS OF STABILIZING, PROTECTING, AND TREATING A WOUND

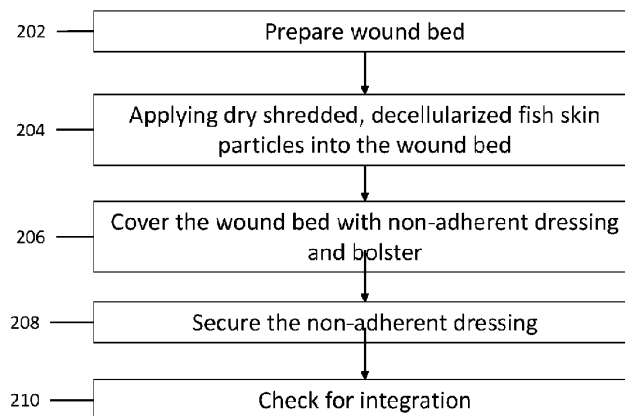

Fig. 2A

(57) Abstract: Wound treatments and wound treatment methods are provided that includes particles of decellularized fish skin. A predetermined percentage of at least a first portion of the particles of decellularized fish skin have a greatest dimension within a predetermined size threshold maximum and a minimum size threshold that is effective to preserve a matrix structure of the decellularized fish skin and to promote cellular regenerative ingrowth into a wound.
