

SLICERABSTRACT OF THE DISCLOSURE

[Subject]

5 To provide a slicer that can be used for a long period of time by suppressing a fastening failure of a fastening bolt for use in securing a slicing blade to a frame.

[Means to Solve Problems]

10 A slicer (1) provided with a slicing blade fixing mechanism (100) having an embedded nut (110) made of metal that is disposed on the rear side of a slicing blade (20), and also disposed inside a nut attaching hole (18) that is communicated with a slit (16), and a fastening bolt (120) that is disposed on the surface side of the slicing blade
15 (20), and is meshed with the embedded nut (110), while being inserted into a bolt hole (21) formed on an end portion of the slicing blade 20.
