

ABSTRACT**Packaging Device for Anti-counterfeiting of Commodities**

5

The invention relates to a packaging device for anti-counterfeiting of a commodity, comprising a housing, the housing defines an accommodation space, the housing has an unpackaging part, the unpackaging part is adapted to be destroyed so as to take the commodity out from the accommodation space, the housing is provided on its outer surface
10 with a lottery ticket part, a valid area of the lottery ticket part covers at least a portion of the unpackaging part, and the valid area is adapted to be destroyed based on the destruction of the unpackaging part. The invention further relates to a packaging device for anti-counterfeiting of a commodity, comprising a housing, the housing defines an accommodation space, the housing has an unpackaging part, the unpackaging part is adapted
15 to be destroyed so as to take the commodity out from the accommodation space, the housing is provided on its outer surface with a lottery ticket part, and the lottery ticket part is provided with a valid area; and the housing further has a covering part, and the covering part covers the valid area in a disposable manner and covers at least a portion of the unpackaging part. The valid area may include a prize-claiming barcode area, and the covering part covers
20 the prize-claiming barcode area. Based on the aforesaid solutions, a lottery ticket may be used to provide an anti-counterfeiting function for the commodity.
